

CASE STUDY No. 3

Fit-out
Equipment
Service

Rest assured:

Solid, ergonomic, reliable and elegant functionality

FEATURES

- Solid, ergonomic and reliable treatment centre
- Scheme included surgery layout design
- Regular site visits ensured project ran to schedule and on budget
- Local engineer support and extended warranty

CASE STUDY No. 3

DESIGN BRIEF: This commission was for a long standing customer, for whom Eclipse has completed many projects over the years. Our brief was to provide equipment for a new practice which was being built to a budget, but required solid, ergonomic and reliable treatment centres. This included a requirement for surgery layout design, complete services drawings and on-site liaison with the builder.

ECLIPSE SOLUTION: Various equipment options were considered for their functionality, reliability and price. The Ancar SD-60 chair package ticked every box. Coupled with a side mounted delivery system, and a two year parts and labour warranty, it proved an excellent choice.

Regular site visits were conducted throughout the project to monitor progress throughout construction and ensure that services were installed to plan.

Close to hand: Side mounted delivery system, with tray for small hand instruments

ANCAR: FLEXIBILITY & RELIABILITY

- Adaptable set-up with wide range of built-in modules
- Choice of delivery unit type and configuration
- Option of electronic touch control with integrated Bein-Air micromotor
- Aluminium construction
- Ambidextrous models for left or right hand users
- 2 Year Parts and Labour Warranty, with 5 year extension option.
