

7 Things That Can Go Wrong With a Fit-Out and How to Avoid Them

- 1** Suction pipework not installed to guidelines, causing loss of suction power.
- 2** Using the wrong type of pipework, causing a risk of disintegration from cleaning agents.
- 3** Electrical supplies not installed correctly, and duct pipes for monitor cabling not included.
- 4** X-ray wiring not planned or installed correctly to Radiation Protection Advisor's requirements.
- 5** Risk of wall-mounted X-rays falling due to using the wrong type of fixings.
- 6** Sinks, taps and wastes not compliant with recommendations.
- 7** Flooring not installed correctly for CQC compliance.

At Eclipse Dental, we understand the potential pitfalls that can lead to downtime, safety hazards and expensive repairs. To learn how to avoid these common mistakes and ensure a successful project, check out our article:
