CASE STUDY

New Heka unit Eclipses everything

Yusef Moazzam Ali from Ramsgate, Kent, recently refurbished his Surgery and is delighted with his Heka Dental Unic Treatment Centre.

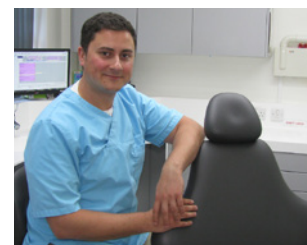

Heka Dental are based in Denmark, known for its style and originality when designing furniture, and I decided to visit them at their factory in Copenhagen. What struck me was their friendliness, hospitality and attention to detail. Most parts are made in Denmark or Germany, and Heka both design and manufacture all their own electronic components.

I was also impressed by the build-quality of every chair, which are mostly made

of cast aluminium, stainless sheet and milled stainless steel. There are no plastic bits that could break. The chair is also extremely comfortable with its memory foam seat, something most patients notice.

I have been using the chair for over 6 months, and other than the adjustment required to its new more ergonomic working style, I have been more than happy. I find myself working more efficiently and in a far more comfortable position than in the past.

I couldn't recommend Heka chairs more highly and look forward to working with them for many years to come."

“Eclipse were always accommodating of any requests and would always go the extra mile.”

Dr S. Yusef Moazzam Ali,
Dental Surgeon

Turning ideas into reality

Whether you are planning a single room refurbishment or a complete new build, we can provide architectural services including planning and building regulation considerations, spatial planning as well as workflows for staff,

patients and instrument sterilisation.

Industry standards including cross-infection, health & safety and disabled access is all carefully integrated at the design stage.
