

# 10 Steps to Starting a Squat Dental Practice

A practical overview from first idea to long-term support

1

## Project Planning

Define timelines, milestones and priorities early.

2

## Cost Analysis / Initial Budgeting

Set an indicative budget without over-engineering decisions.

3

## Choosing the Right Location

Assess demographics, competition and access.

4

## Planning Permissions & Building Regs

Understand planning, building control and compliance early.

5

## Securing Financing

Prepare cost breakdowns and funding options.

6

## Professional Interior Design

Plan workflows, compliance and patient experience.

7

## Required Trades for Fit-Out

Coordinate specialist dental contractors.

8

## Essential Equipment Selection

Choose compliant, future-ready equipment.

9

## Installation of Dental Equipment

Install, commission and train your team on your equipment.

10

## Support & Maintenance

Protect uptime with planned servicing and support.
